

## **Secure ID Solutions**

*Providing Secure Credentialing, Authentication, and Identity Management Solutions*

DSA is leveraging its vast experience in building, implementing, and integrating mission critical IT infrastructure systems to focus on delivering privacy and IT services to government, healthcare and civilian communities. In support of this strategic initiative, DSA has collaborated with multiple technology partners to produce best of breed credentialing, authentication, and identity management solutions to satisfy the needs of each community.

DSA is a Certified FiXs Personal Identity Verification (PIV) credential issuer. These credentials are compliant with FIPS 201 and HSPD-12, and meet all the requirements for PIV Interoperability for Non-Federal Issuers.

Our services in this area include:

- Certification & Accreditation (C&A) of federal government IT systems
- Personal Health Record (PHR) Smart Cards
- Integrated Secure Identity Management Solutions (ISIMS) applications and services for schools and organizations
- Identity and biometric verification hardware solutions
- Secure PKI enabled role-based authentication and access control to enterprise applications (e.g., portals, databases, and health care systems)
- Identity management process engineering and registration support.
